-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kageyama in view of Refsdal and Kahn. In regard to claim 1, Kageyama discloses a mechanical crayon pen comprised of a barrel 12 having an open top and a bottom tip, a thrust device having an inner tube 22 movably mounted in the barrel wherein the inner tube has an outer diameter smaller than an inner diameter of the barrel such that a space is formed therebetween, a hollow shaft having a clutch ring 24 at the bottom thereof press fit into the inner tube and a spring 30 mounted around the hollow shaft between the inner tube and the clutch ring and a thrust actuator having a cap 14 with a central hole and rotatably mounted on the barrel 12 (elements 11 and 12 are threadedly connected and are thereby rotatably mounted to each other, see column 3, lines 11-13) and a push button 32 detachably and moveably mounted on the cap to push the inner tube downward. It is noted that the statements of intended use, i.e., "to hold the multiple crayon sticks" do not lend any patentably structure to the claim. i.e, the Kageyama device is capable of holding multiple crayon sticks in the space between the inner tube 22 and the barrel 12 (see Figure 1). Although the barrel in the Kageyama reference is

Art Unit: 3751

not disclosed as being transparent, attention is directed to the Refsdal and Kahn references, which disclose other mechanical pencils wherein various portions of the barrel are formed from transparent material in order to enable a user to view the interior of the device (see page 2, column 1, lines 6-14 of Kahn and column 3, lines 23-32 of Refsdal). Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to form the barrel in the Kageyama device from a transparent material in order to enable a user to view the interior of the device.

Allowable Subject Matter

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Harvey, Raimondi, Dorfman, Fleming and Zimdars references are cited for disclosing pencils having multiple crayon sticks therein.
